

EmONC indicators

Domain 1: Structure Equitably distributed, well-functioning EmONC facilities	
Availability	1a. Progress toward long-term goal for EmONC availability
	1b. Progress toward interim goal for scaling up EmONC availability
Adequate conditions to provide good-quality care ("readiness")	2. Basic infrastructure
	3. Equipment, drugs & supplies
	4. Health workforce adequate for caseload
	5. Emergency referral readiness
Accessibility	6. Home to Comprehensive EmONC within 1hr
Domain 2: Process People's interaction with the system	
Place of delivery	7. Institutional delivery rate
Met need	8. Met need for emergency obstetric care
Clinical appropriateness of care	9. Cesarean section as a proportion of all expected births
Experience of care	10. Person-centered maternity care
	11. Togetherness - 24h/7d family access to inpatient newborn care unit
Health workforce wellbeing	12. Health workforce wellbeing
Domain 3: Outcomes Effectiveness of care	
Impact on maternal mortality in health facilities	13. Institutional maternal mortality ratio
	14. Direct obstetric case fatality rate
Impact on stillbirths and newborn mortality in health facilities	15. Intrapartum stillbirth and very early neonatal death rate
	16. Neonatal inpatient mortality rate
