

## EmONC signal function checklists

Lists of EmONC signal functions by potential EmONC level:

Basic EmONC Signal Functions	Performed	Not performed
<b>OBSTETRIC</b>		
Administer medications to treat postpartum hemorrhage	<input type="checkbox"/>	<input type="checkbox"/>
Administer parenteral antibiotics (woman)	<input type="checkbox"/>	<input type="checkbox"/>
Administer magnesium sulfate	<input type="checkbox"/>	<input type="checkbox"/>
Remove retained products of conception	<input type="checkbox"/>	<input type="checkbox"/>
Perform manual removal of placenta	<input type="checkbox"/>	<input type="checkbox"/>
Perform assisted vaginal birth	<input type="checkbox"/>	<input type="checkbox"/>
Provide IV fluid replacement therapy (woman)	<input type="checkbox"/>	<input type="checkbox"/>
<b>NEONATAL</b>		
Perform newborn resuscitation with bag and mask	<input type="checkbox"/>	<input type="checkbox"/>
Initiate and support early and exclusive breastfeeding	<input type="checkbox"/>	<input type="checkbox"/>
Administer parenteral antibiotics (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Practice immediate kangaroo mother care for preterm and low birthweight infants	<input type="checkbox"/>	<input type="checkbox"/>
Administer oxygen therapy with pulse oximetry for stabilization and transportation (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
<b>REFERRAL</b>		
Arrange ambulance, with trained and equipped provider, to a facility that can provide definitive care (woman and/or newborn)	<input type="checkbox"/>	<input type="checkbox"/>

Comprehensive EmONC Signal Functions	Performed	Not performed
<b>OBSTETRIC</b>		
Administer medications to treat postpartum hemorrhage	<input type="checkbox"/>	<input type="checkbox"/>
Administer parenteral antibiotics (woman)	<input type="checkbox"/>	<input type="checkbox"/>
Administer magnesium sulfate	<input type="checkbox"/>	<input type="checkbox"/>
Remove retained products of conception	<input type="checkbox"/>	<input type="checkbox"/>
Perform manual removal of placenta	<input type="checkbox"/>	<input type="checkbox"/>
Perform assisted vaginal birth	<input type="checkbox"/>	<input type="checkbox"/>
Provide IV fluid replacement therapy (woman)	<input type="checkbox"/>	<input type="checkbox"/>
Administer antenatal corticosteroids	<input type="checkbox"/>	<input type="checkbox"/>
Perform cesarean section	<input type="checkbox"/>	<input type="checkbox"/>
Perform blood transfusion (woman)	<input type="checkbox"/>	<input type="checkbox"/>
<b>NEONATAL</b>		
Perform newborn resuscitation with bag and mask	<input type="checkbox"/>	<input type="checkbox"/>
Initiate and support early and exclusive breastfeeding	<input type="checkbox"/>	<input type="checkbox"/>
Administer parenteral antibiotics (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Practice immediate kangaroo mother care for preterm and low birthweight infants	<input type="checkbox"/>	<input type="checkbox"/>
Provide thermal care with radiant warmer or incubator (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Administer oxygen therapy with pulse oximetry (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Provide CPAP (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Provide phototherapy (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Perform blood transfusion (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Enable assisted feeding with expressed breast milk with cup and spoon and tube feeding	<input type="checkbox"/>	<input type="checkbox"/>
Provide IV fluids (newborn)	<input type="checkbox"/>	<input type="checkbox"/>

Intensive EmONC Signal Functions	Performed	Not performed
<b>OBSTETRIC</b>		
Administer medications to treat postpartum hemorrhage	<input type="checkbox"/>	<input type="checkbox"/>
Administer parenteral antibiotics (woman)	<input type="checkbox"/>	<input type="checkbox"/>
Administer magnesium sulfate	<input type="checkbox"/>	<input type="checkbox"/>
Remove retained products of conception	<input type="checkbox"/>	<input type="checkbox"/>
Perform manual removal of placenta	<input type="checkbox"/>	<input type="checkbox"/>
Perform assisted vaginal birth	<input type="checkbox"/>	<input type="checkbox"/>
Provide IV fluid replacement therapy (woman)	<input type="checkbox"/>	<input type="checkbox"/>
Administer antenatal corticosteroids	<input type="checkbox"/>	<input type="checkbox"/>
Perform cesarean section	<input type="checkbox"/>	<input type="checkbox"/>
Perform blood transfusion (woman)	<input type="checkbox"/>	<input type="checkbox"/>
Provide intensive level organ support (woman)	<input type="checkbox"/>	<input type="checkbox"/>
<b>NEONATAL</b>		
Perform newborn resuscitation with bag and mask	<input type="checkbox"/>	<input type="checkbox"/>
Initiate and support early and exclusive breastfeeding	<input type="checkbox"/>	<input type="checkbox"/>
Administer parenteral antibiotics (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Practice immediate kangaroo mother care for preterm and low birthweight infants	<input type="checkbox"/>	<input type="checkbox"/>
Provide thermal care with radiant warmer or incubator (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Administer oxygen therapy with pulse oximetry (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Provide CPAP (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Provide phototherapy (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Perform blood transfusion (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Enable assisted feeding with expressed breast milk with cup and spoon and tube feeding	<input type="checkbox"/>	<input type="checkbox"/>
Provide IV fluids (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Perform mechanical ventilation (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
Perform screening and treatment for retinopathy of prematurity (newborn)	<input type="checkbox"/>	<input type="checkbox"/>
